

ASYMMETRIC WEIGHING AND GRADING REHANGER

The future moves
at exceptional speeds

- ✓ Simplify your line. Maximize performance
- ✓ Unmatched transfer accuracy at unrivaled speed
- ✓ Most consistent weighing, tailored grading, total control

meyn®

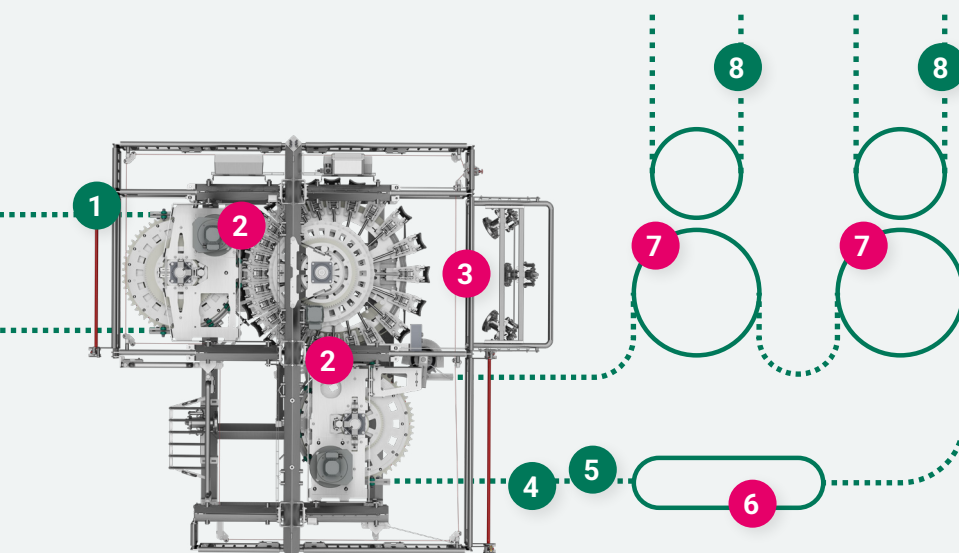

Simplify your line. Maximize performance

Simplify your line with one solution for weighing, grading, and transfer

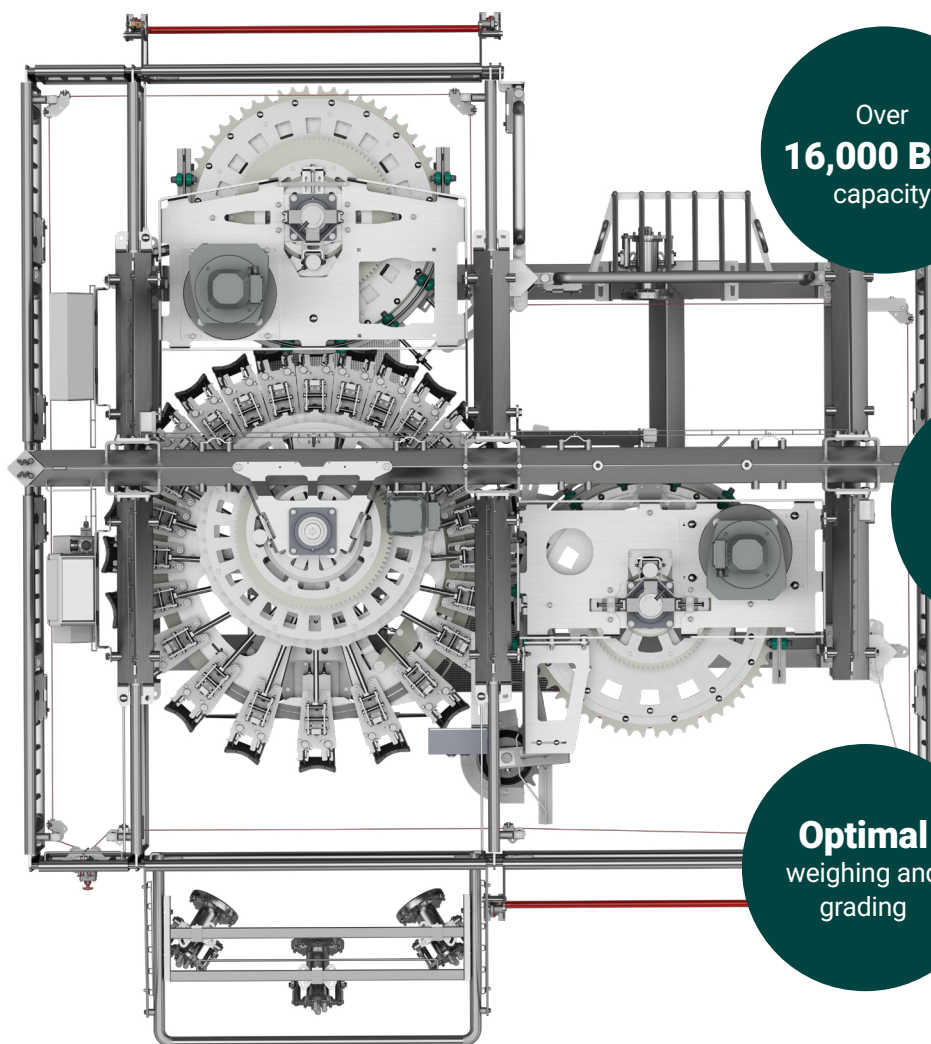

Streamline your processing line with a compact system that combines precision weighing, grading, and leading transfer performance — all in one machine. Designed for seamless integration into both new and existing Meyn Chill-Sort-Cut-up configurations, it connects 6" chill shackles to low-maintenance 8" sorting line shackles without compromise. Built for efficiency, durability, and uptime, with the lowest total cost of ownership.

- New shaft in the Carousel M2.0 rehanger for smooth, precise selective transfers
- Compatible with simple maintenance free sorting shackles
- New M3.0 drop stations ensuring controlled bird release

Most efficient poultry processing setup

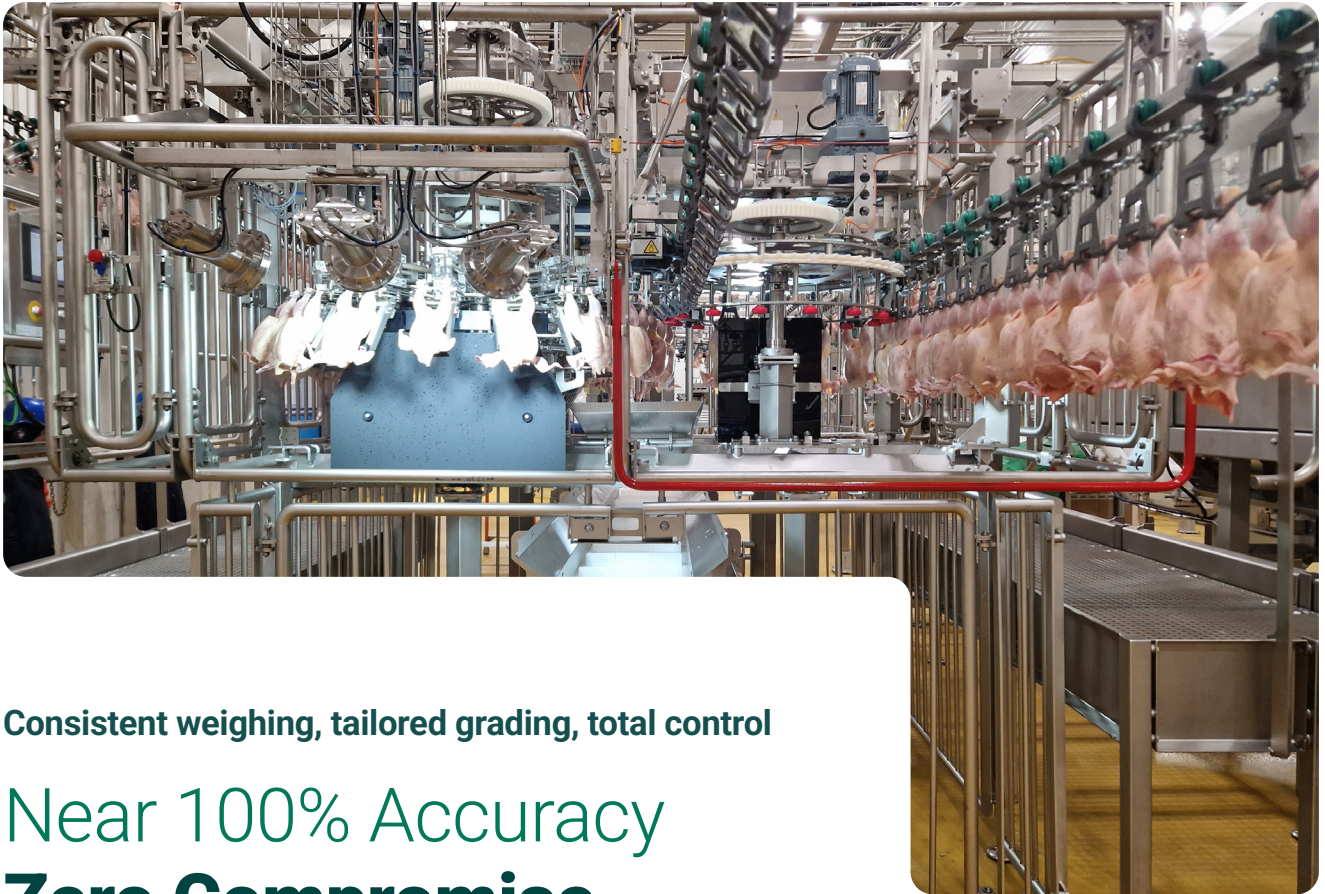

1. Incoming air chill line
2. Synchronized chill to sort transfer
3. Weighing and grading with full bird separation
4. 8" sorting line
5. Maintenance-free S1 shackle
6. M3.0 dropstations
7. Redesigned shaft Carousel M2.0
8. 12" cut-up line

Unmatched transfer accuracy at unrivalled speed

Maximize yield and minimize rework with industry-leading performance

The Asymmetric Rehanger sets the standard for high-speed poultry processing by reliably handling more than 16,000 birds per hour with near-perfect transfer rates and full synchronization. Birds move seamlessly from the 6" chilling line to the 8" sorting line through fixed carriers that spread apart to prevent contact. Dual parallel load cells positioned at the widest section deliver exceptional weighing accuracy. The four-camera Multi Vision system provides complete 360° grading, ensuring accurate distribution based on weight and visual criteria.

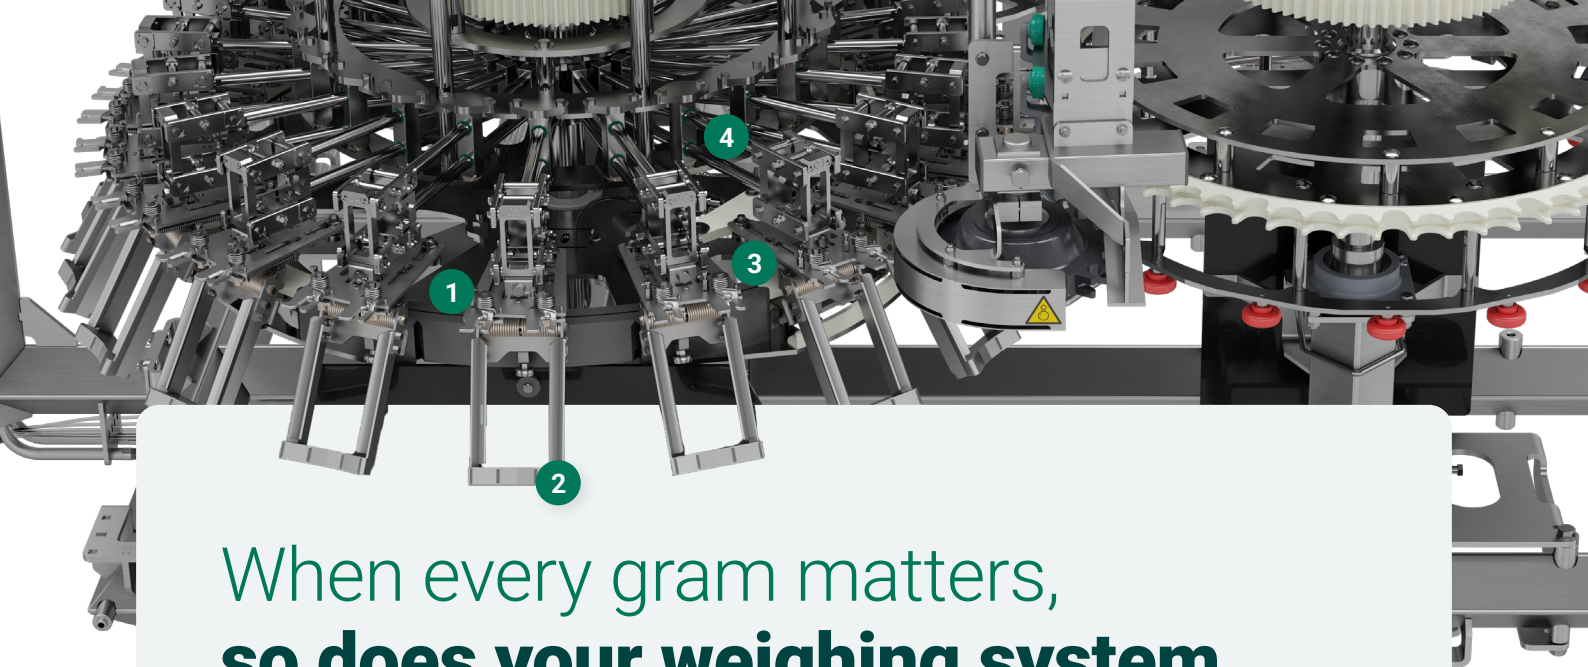

Consistent weighing, tailored grading, total control

Near 100% Accuracy **Zero Compromise**

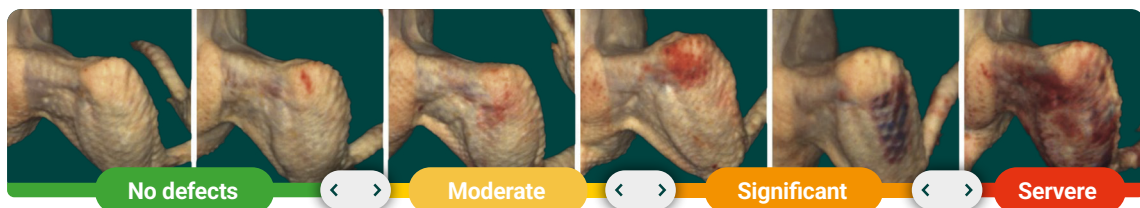

The Multi Vision Grading system uses four high-resolution cameras for a complete 360° view of each bird—three at the point of maximum carrier separation and one on the outgoing line to detect all defects, even in the wing pits and groins.

AI-trained vision software accurately grades each part of the bird for all key quality features. Standard grading recipes and an intuitive interface enable fast, accurate tailored distribution.

When every gram matters, so does your weighing system

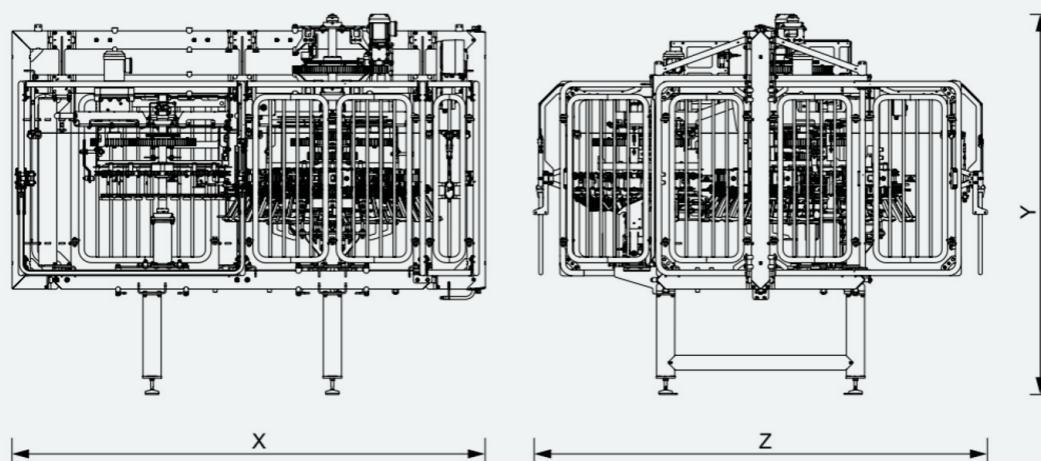

In the middle shaft, mechanically locking leg carriers **1** with integrated back support **2** keep each bird fully stable during weighing. The carriers spread eccentrically for complete bird separation and pass alternately over fixed double load cells, **3** maximizing weighing time. The robust, fixed weighing units **4** and durable mechanical design ensure long-term reliability while delivering highly consistent and precise measurements.

Determine the desired quality thresholds with the help of clear photo examples

Simply adjust the sliders to adjust quality thresholds and determine the desired destinations. With a simple mouse click additional quality grades can be added or removed. Settings can be quickly adjusted to accommodate changes in supply and demand, ensuring optimal production for maximum profit.

Product specifications

Length (X)	3,490 mm
Height (Y)	2,806 mm
Width (Z)	3,342 mm
Installed weight of the machine	2,500 kg
Installed weight of the safety fencing*	500 kg
Installed electrical power	220-480 kW**
Compressed air connection	Push-in connector 10 mm
Compressed air consumption	<0.1m3/h
Options	Weighing, left direction of rotation Weighing, right direction of rotation

* Supplied separately from the machine.

** Dependent on the customer's motor drives.

What's your **next move?**

Meyn® Consultancy & Audits

- Enhance your operational efficiency
- Expand your production capabilities
- Identify new market opportunities

Meyn® Academy

- Safeguard investments and enhance profitability
- Specific system and machine training
- Customer specific training options

Meyn® demo's

- Products, services and insights
- Tailormade demo's based on your needs
- Available online in multiple languages

Secure **business continuity**

Meyn Services provides comprehensive support to optimize the performance and reliability of Meyn equipment.

With a strong emphasis on global reach and local presence, Meyn offers various services to ensure customer satisfaction and operational efficiency.

Technical Support

- ✓ Global assistance
- ✓ Corrective and preventive services
- ✓ 24/7 Helpdesk

Maintenance

- ✓ Tailored maintenance
- ✓ Updates and inspections
- ✓ Machine maintenance

Parts

- ✓ OEM replacement parts
- ✓ Always available
- ✓ eProcurement portal
