

GRANDE DRAWER SYSTEM

Designed to optimize both **meat quality and animal welfare**

- ✓ High efficiency for automatic or manual loading
- ✓ Prevents heat stress and preserves meat quality
- ✓ Can be set up in multiple configurations

MEYN[®]

Live bird handling significantly impacts **quality and yield.**

Live bird handling, from farm to processing line, has a significant influence on quality and yield. Careful live bird handling optimizes both animal welfare and profits. Birds are loaded bottom-up inside the module, and the module openings are large so that birds are placed in the drawers without damage, whether manually or automatically. The 255 mm drawer height ensures adequate headspace and ventilation for all birds.

Operation

Depending on plant requirements, the Grande drawer system's flexible layout can be set up in a U- or I-shape.

The Grande Drawer System

The Grande drawer system seamlessly integrates into any line speed, with washing of drawers/modules included. The system can be extended with weighing, multistage CO2 stunning, automatic lairage systems and automatic truck unloading and loading.

Customizable to Fit Your Operation

Whether you need a compact 4-layer module or a high-capacity 5+5 layer system, the Grande Drawer System can be tailored to your plant's needs. Flexible configuration options like U- and I-shape layouts ensure smooth integration into existing lines—no matter your space or speed requirements.
